Key Benefits

With the **DocShare** data space, share, maintain and manage important digital content in one place – for seamless collaboration with your customers, colleagues and partners.

- Quickly find the right documents
- Always work with the latest version
- Access earlier versions of documents easily
- Role-based access management
- Reduce effort expended on management and thus reduce costs

Did you know?

Day-to-day life at a financial services provider...

A credit application for finance requires various documents from the customer. Nowadays these are mostly in different folders on individual employees' computers - as PDFs, emails or scanned copies. If the application process has already been processed, there may also be different versions of the documents. If an employee goes on leave or gets ill at this point, it takes their colleagues a long time - if it isn't impossible altogether - to find and compare the correct and current documents. Coordination difficulties and errors are waiting to happen!

It's better with DocShare!

With DocShare, you get a simple and user-friendly sharing solution for documents.

DocShare makes it easier to exchange information both with customers and partners and between colleagues, and improves the process. The solution lets your employees work together easily and securely both inside and outside the organisation - including via mobile end devices.

Everyone on the same version

With DocShare, documents can be stored and shared in one place in a structured manner – with customers, colleagues and partners.

Email-free exchange

No more complex email chains: your employees can always access the correct version of a file and see the current status.

Easy working

The user-friendly interface makes your employees' working day easier, minimises errors and improves communication with customers.
